Q12. Find out the correct word for the given expression :

A person who is eighty years old.'

- (a) Octogenarian (b) Octosyllabic
(c) Octometer (d) Octogenesis

Read following passage carefully and answer the questions that follow (13 to 16):

Philosophy of Education is a label applied to the study of the purpose, process, nature and ideals of education. It can be considered a branch of both philosophy and education. Education can be defined as the teaching and learning of specific skills, and the imparting of knowledge, judgment and wisdom, and is something broader than the societal institution of education we often speak of.

Many educationalists consider it a weak and woolly field, too far removed from the practical applications of the real world to be useful. But philosophers dating back to Plato and the Ancient Greeks have given the area much thought and emphasis, and there is little doubt that their work has helped shape the practice of education over the millennia.

Plato is the earliest important educational thinker, and education is an essential element in "The Republic" (his most important work on philosophy and political theory, written around 360 B.C.). In it, he advocates some rather extreme methods: removing children from their mothers' care and raising them as wards of the state, and differentiating children suitable to the various castes, the highest receiving the most education, so that they could act as guardians of the city and care for the less able. He believed that education should be holistic, including facts, skills, physical discipline, music and art. Plato believed that talent and intelligence is not distributed genetically and thus is to be found in children born to all classes, although his proposed system of selective public education for an educated minority of the population does not really follow a democratic model.

Aristotle considered human nature, habit and reason to be equally important forces to be cultivated in education, the ultimate aim of which should be to produce good and virtuous citizens. He proposed that teachers lead their students systematically, and that repetition be used as a key tool to develop good habits, unlike Socrates' emphasis on questioning his listeners to bring out their own ideas. He emphasized the balancing of the theoretical and practical aspects of subjects taught, among which he explicitly mentions reading, writing, mathematics, music, physical education, literature, history, and a wide range of sciences, as well as play, which he also considered important.

During the Medieval period, the idea of Perennialism was first formulated by St. Thomas Aquinas in his work "De Magistro". Perennialism holds that one should teach those things deemed to be of everlasting importance to all people everywhere, namely principles and reasoning, not just facts (which are apt to change over time), and that one should teach first about people, not machines or techniques. It was originally religious in nature, and it was only much later that a theory of secular perennialism developed.

During the Renaissance, the French skeptic Michel de Montaigne (1533-1592) was one of the first to critically look at education. Unusually for his time, Montaigne was willing to question the conventional wisdom of the period, calling into question the whole edifice of the educational system, and the implicit assumption that university-educated philosophers were necessarily wiser than uneducated farm workers, for example,

On the basis of the reading of the above passage, answer the questions (13 to 16) choosing the most appropriate option from those given below after every question:

Q13. What is the difference between the approaches of Socrates and Aristotle?

(a) Aristotle felt the need for repetition to develop good habits in students, Socrates felt that students need to be constantly questioned.

(b) Aristotle felt the need for rote-learning; Socrates emphasized on dialogue learning

(c) There was no difference.

(d) Aristotle emphasized on the importance of paying attention to human nature; Socrates emphasized upon science.

Q14. Why do educationists consider philosophy a 'weak and woolly' field?

(a) Its theoretical concepts are easily understood (b) It is irrelevant for education

(c) It is not practically applicable (d) Both (a) and (b)

Q15. What do you understand by the term 'Perennialism' in the context of the given comprehension passage?

(a) It refers to something which is of ceaseless importance.

(b) It refers to something which is quite unnecessary.

(c) It refers to something which is abstract and theoretical.

(d) It refers to something which existed in the past and no longer exists now.

Q16. Were Plato's beliefs about education democratic?

(a) He believed that only rich have the right to acquire education,

(b) Yes

(c) He believed that only a select few are meant to attend schools.

Q66. In which year was 'Consumer Protection Act' introduced in India?

(a) 1986

(b) 1982

(c) 1988

(d) 1991

Q67. Recruitment, Selection and Training is part of which function Management?

(a) Planning

(b) Staffing

(c) Controlling

(d) Directing

Q68. Product provide which of the following benefits to a customer?

(a) Branding: Benefits

(b) Industrial Benefits

(c) Durability Benefits

(d) Functional Benefits

Q69. Trading on Equity refers to :

(a) Proportion of debt in the overall capital

(b) Number of time companies EBIT cover the interest payment Obligation

(c) Ability of business to generate enough cash flow

(d) Cost involved in the issue of shares or debentures

Q70. The minimum net worth stipulated by SEBI for a depository is :

(a) ₹200 crore

(b) ₹100 crore

(c) ₹300 crore

(d) ₹250 crore

Q71. Production Possibility Curve is concave to the origin because

(a) Marginal opportunity cost is increasing

(b) Marginal opportunity cost is decreasing

(c) Marginal opportunity cost is constant

(d) None of the above

Q72. Which of the following item is not included in the national income?

(a) Income of actors

(b) Bonus

(c) Income of brokers

(d) Old age pensions

Q73. A consumer maximises satisfaction when indifference curve is

- (a) Tangent to the budget line (b) Above the budget line
(c) Below the budget line (d) Tangent to the budget line at two points

Q74. Under perfect competition price line is

- (a) upward sloping (b) horizontal sloping
(c) downward sloping (d) above the marginal revenue curve

Q75. Which of the following function is a part of the 'Contingent function money'?

- (a) Distribution of national income (b) Store of value
(c) Medium of exchange (d) Standard of deferred payment

Q76. The difference between Gross Domestic Product (GDP) and Gross National Product (GNP) is the:

- (a) Value of final goods and services produced by domestically owned factors of production within a given period.
(b) (Net income earned by domestic residents/businesses from overseas investments) - (Net income caused by foreign residents/businesses from domestic investments).
(c) Depreciation Cost.
(d) National Income.

Q77. The condition for consumer equilibrium on the basis of indifference curve approach is

- (a) $MU_X = MU_Y$
(b) $MRS_{XY} = MU_X / MU_Y$
(c) $MU_X / MU_Y = P_X / P_Y$
(d) $MRS_{XY} = P_Y / P_X$

Q78. In case of monopoly market situation, cross elasticity of demand is

- (a) Greater than one (b) Less than one
(c) Infinity (d) Zero

Q79. Which of the following describes the characteristics of an oligopoly firm?

- (a) each seller is aware of the influence of his actions on the other sellers

- (b) is a price taker
- (c) an industry with one seller
- (d) an industry with large number of sellers

Q80.If a demand curve shifts to the right, it means

- (a) price of the commodity has gone down
- (b) demand function has improved
- (c) the supply function has improved
- (d) the real income of the consumer has gone down

Q81.Standard deviation is calculated on the basis of

- (a) Mean
- (b) Median
- (c) Mode
- (d) None of these

Q82.Fisher's Ideal Index is

- (a) Arithmetic mean of Laspyre's and Paasche index
- (b) Harmonic mean of Laspyre's and Paasche index
- (c) Geometric mean of Laspyre's and Paasche index
- (d) None of these

Q83.A coin is tossed 4 times then the probability of getting two or more heads

- (a) $\frac{11}{16}$
- (b) $\frac{3}{16}$
- (c) $\frac{5}{16}$
- (d) $\frac{15}{19}$

84.If N. people are seated at round table, what is the probability that two named individuals will be neighbours?

- (a) $\frac{1}{N-1}$
- (b) $\frac{2}{N+1}$
- (c) $\frac{N-1}{N}$
- (d) $\frac{N}{N-1}$

Q85.For any two events A and B, which one is true?

Practice Question

Previous Year 2021

(a) $P(A/B) \geq \frac{P(A) + P(B) - 1}{P(B)}$

(b) $P(A/B) \leq \frac{P(A) + P(B) - 1}{P(B)}$

(c) Both (a) and (b)

(d) $P(A/B) \geq \frac{P(A) + P(B) + 1}{P(B)}$

Q86. For Negative Skewed data, what is true?

(a) Mean > Median

(b) Mean < Median

(c) Mean < Mode

(d) Both (b) and (c)

Q87. For Mutually Exclusive events A and B, which one is true?

(a) $A \cap B \neq \emptyset$

(b) $A \cup B \neq \emptyset$

(c) $A \neq B$

(d) Both (a) and (c)

88. Density Test is applied in

(a) Mean

(b) Mode

(c) Median

(d) None of these

Q89. If a pair of dice is thrown, the probability that the sum of the digits is neither 7 nor 11 is

(a) $\frac{2}{9}$

(b) $\frac{7}{9}$

(c) $\frac{1}{6}$

(d) $\frac{8}{36}$

Q90. Sheppard's corrected standard deviation is

(a) $\sqrt{6^2 - \frac{h^2}{12}}$

(b) $\sqrt{6^2 - \frac{h}{12}}$

(c) $\sqrt{h^2 - \frac{6^2}{12}}$

(d) $6^2 - \frac{h^2}{12}$

Q91. If 15 workers can build a wall in 48 hours, how many workers will be required to do the same work in 30 hours ?

- (a) 24 (b) 25
(c) 26 (d) 27

Q92. The price of a scooter was Rs. 34,000 last year. It has increased by 20% this year. What is the price now?

- (a) Rs. 32,300 (b) Rs. 40,800
(c) Rs. 32,600 (d) Rs. 31,200

Q93. What should come next in the following number series?

13, 34, 57, 92, 1415

- (a) 112 (b) 133
(c) 145 (d) 181

Q94. What should come next in the following number series? 21, 10, 31, 41, 72, 113,

- (a) 155 (b) 182
(c) 175 (d) 185

Q95. Sunita stands with her face pointing to the south-east direction. She walks 15 metres and then turns northwards and walks another 12 metres. How far is she from the starting point?

- (a) 3 metres (b) 27 metres
(c) 9 metres (d) None of these

Q96. If in a certain language, HAPPY is coded as IBOOZ, how is 'RIGHT' coded in that code?

- (a) SKGHU (b) SGKUQ
(c) SIHIU (d) QHFGS

Q97. Choose the correct alternative which represents the same relationship as the first two:
16:35:: 24:?

- (a) 50 (b) 36
(c) 12 (d) 30

Q98. The following figure is a circle because:

- (a) it has small area (b) it can be divided into 8 parts
(c) it has no direction (d) it has no angle

Q99. The problem contains a question and two statements giving certain data, You have to decide whether the data given in the statements are sufficient for answering the question.

Is p positive?

1. $p + q + r > 0$

2. $p > q + r$.

- (a) If statement 1 alone is sufficient but statement 2 alone is not sufficient
(b) If statement 2 alone is sufficient but statement 1 alone is not sufficient
(c) If both statements 1 and 2 together are sufficient but neither of alone is sufficient
(d) If statements 1 and 2 together are not sufficient

Q100. 5 years ago the combined age of my mother and mine was 40 years. Now the ratio of our age is 4:1. How old is my mother?

- (a) 10 (b) 40
(c) 60 (d) 2
